SUMMARY

Motivated software engineering student with hands-on experience in project collaboration, backend development, and youth-focused tech initiatives. Passionate about creating social impact through structured programs.

SKILLS

Program & Project Skills: Project Coordination, Program Implementation, Communication, Stakeholder Engagement, Time Management, Report Writing.

Technical Skills: JavaScript, TypeScript, Node.js, Express.js, MongoDB, SQL, RESTful APIs, Git, CI/CD, Automated Testing

Soft Skills: Team Leadership, Collaboration, Problem Solving, Adaptability, Continuous Learning

EDUCATION

Miva Open University

Lagos, Nigeria

Bachelor of Software Engineering

Expected Jan 2027

Relevant Coursework: Introduction to Software Engineering, Software Requirements Engineering, Software Engineering Process, Systems Analysis and Design, Computer Programming I & II, Introduction to Problem Solving, Introduction to Web Technologies, Entrepreneurship and Innovation

PROFESSIONAL EXPERIENCE

Backend Developer Intern – Syx Labs

October 2024 – March 2025

- Integrated MongoDB database solutions, ensuring secure and efficient data management.
 - Collaborated cross-functionally with frontend engineers, product managers, and AI teams to deliver seamless backend support.
 - Authored multiple internal and external technical documentations to support backend architecture, API usage, and deployment processes.
 - Participated in code reviews to maintain best practices and foster knowledge sharing.
-

VOLUNTEERING & LEADERSHIP

Project Volunteer – Africa Agility Foundation

June 2024 – July 2024

- Coordinated backend development efforts in line with program timelines and objectives.
- Contributed to documentation, reporting, and stakeholder engagement activities..

Team Lead, Backend Development – Hackathon (Africa Agility)

July 2024

- Led a team of backend developers to build a functional API for a youth empowerment platform.
 - Collaborated with designers, product managers, and developers in a fast-paced nonprofit environment.
-

CERTIFICATIONS

Backend Development Certification – Africa Agility Foundation

July 2024

Gained hands-on experience building secure APIs with Node.js, MongoDB, EJS, and GraphQL. Collaborated on tech-for-good projects alongside UI/UX designers, data scientists, and Scrum Masters.
